**“GIS Tools for Inlet and Beach Management”**

The U.S. Army Corps of Engineers’ Coastal Inlets Research Program (CIRP) is pleased to again offer a 1-1/2 day workshop in conjunction with the Year 2002 National Conference on Beach Preservation Technology. The Third Annual CIRP Technology Transfer Workshop is intended for coastal engineers and scientists interested in learning recent advances in GIS technology for managing inlets and beaches. The workshop should be of interest to engineers and scientists in government, private industry, and academia who work with inlet channel operation and maintenance, beach preservation, sediment budgets, geospatial data analysis, and regional sediment-management.

The workshop is non-profit, and a nominal course fee of \$150 will be assessed to cover audio-visual equipment, two lunches, coffee breaks, and other logistical costs. Participation will be limited to 75 attendees. The theme of the workshop is “GIS Tools for Inlet and Beach Management.” For further information on the workshop, please consult <http://www.fsbpa.com/>. Information about the CIRP can be found at <http://cirp.wes.army.mil/cirp/cirp.html>. The workshop is being organized by CIRP members at the U.S. Army Engineer Research and Development Center, Coastal and Hydraulics Laboratory, Vicksburg, MS.
